Last month we featured the Motorola radios that were and weren't FCC compliant. If you missed it and need a complete listing, please e-mail [crystal@allcomm.com](mailto:crystal@allcomm.com)

 **ALLCOMM**  
Wireless, Inc.  
The Ultimate in Communications Products and Services

### Narrowbanding Services offered by Allcomm:

- ◆ **License Modification:** We will evaluate and submit any needed modification to your existing FCC licenses.
- ◆ **Inventory Assessment:** Allcomm will inventory your current radio setup and detail the changes needed to bring your system into compliance including reprogramming or replacing existing radios.
- ◆ **Implementation:** We can provide a step-by-step plan for compliance allowing you to develop both budget and interoperability requirements.

# Annual 9-1-1 Goes to Washington

March the 28th - April the 1st was the annual “9-1-1 Goes to Washington” conference. More than 200 9-1-1 leaders from across the country met in Washington to support the national 9-1-1 legislative agenda. Leaders from the Alabama chapter included Baldwin, Cullman, Chambers, Huntsville/Madison, Etowah, Houston, Marshall, Sumter, and Walker Counties. Our expert 9-1-1 Salesman, Kris Young, made the trip to Washington to support the local chapters. This years conference focused on the FCC’s main goal of promoting and moving forward with next generation 911 (NG-911). Their opinions were all the same: in order to build-out a nationwide IP-based 9-1-1 system, the federal government needs to provide sufficient funding. This project began in 2003 and continues towards the ultimate goal of establishing national standards and implementing plans to accomplish advanced 9-1-1 systems and services using text, data, images, and video. For more information on next

generation 9-1-1, please contact:

Kris Young (205) 913-2323
