Safety First in K-12 Schools

GROWING CONCERNS. GREATER CHALLENGES. TIGHTER BUDGETS.

What can schools do to increase student safety and improve efficiency with plummeted funds?

Educators know that ensuring physical safety for students is paramount for their performance and success. A coordinated, integrated, and reliable communications system needs to be in place for this to happen. Two-way radios play a major role in school districts for coordinating response and enhancing student safety.

The radios can be used at bus and student loading zones, after school programs, playgrounds, sporting events, field trips, and for classroom communication with administrators and security.

Two-way radios are an attractive and affordable solution for dollar-challenged school districts. They offer better coverage and clearer voice. Their greater capacity means educators can connect more people from building to building or throughout a district.

Stuart Mitchell

Stuart began working with Allcomm Wireless in September 2013. Since then, he has been taking care of our customers in the Shelby County market. He is now taking over the sales position at our Sylacauga office serving Talladega, Clay, Randolph, Coosa, Tallapoosa, Chambers, Lee, and Russell counties while still serving our Shelby County customers. Stuart is a Birmingham native growing up in the Vestavia Hills area. He is a graduate from the University of Alabama with a Bachelors in Commerce and Business Administration. He enjoys going to concerts, being outdoors, and watching football. Stuart looks forward to serving you the best he can. You can contact him with any of your wireless needs using the information below.
