Keeping Our Schools Safe

EDUCATION O2 EMERGENCY PUSHBUTTON

This unique control station configuration is designed for easy access emergency alert for school safety applications. The extra large orange emergency button activates emergency alert on County/State Public Safety systems. Wouldn't it be nice to have this in your child's school where with a touch of one button a principal, teacher, or administrator could send an emergency alert to the local 911 dispatcher? The emergency alerts are broadcasted at the touch of a button for quick and rapid response.

This feature is very simple yet extremely efficient.

Some of the key benefits include: the easy to use control head, built-in speaker, fixed volume, one talk group, hot microphone feature, utilizes existing ASTRO alert protocol, and still allows for an external accessory.

Together let's try to stop the headlines like Columbine, Sandy Hook, and Virginia Tech from becoming common occurrences.

DO YOU THINK ALL POLICE OFFICERS SHOULD WEAR A BODY WORN CAMERA?

You may be aware of the public outcry for BodyCams for police officers as a result of the recent unrest in Ferguson, MO. About 3 weeks ago there were several talk shows where callers were calling for a "GoPro on every cop." A Saturday's edition of Wall Street Journal had a page 3 article entitled "More Officers Wearing Body Cameras."

This Eye3Witness just might be the answer.

The Eye3Witness Lite is an exciting new technology that brings the power of 1080P video recording even closer to the action. Attachable to the shoulder loop or shirt pocket, the Eye3Witness Lite provides a recording of the wearer's face to face view while in the field. Additionally the system records audio and optionally logs gps location, viewable on playback. The articulated belt clip lets you adjust the camera angle and start/stop recording without removing the device. A long lasting lithium ion battery ensures that the Eye3Witness Lite will last through the whole shift even at maximum quality settings.

- 16 megapixel HD image sensor
- Supports true HD recording
- Built-in 2 inch TFT LCD display
- 5 second pre-recording feature
- Optional GPS logging
- 140° viewing angle
- Optional external camera
- 2500mAh high capacity battery
- High performance specialized CMOS sensor and video DSP
- Ruggedized construction allows for operation in harsh conditions

Debra Ricks

Bio:

I am married with 3 adult children ages 20-24. I have lived in Sylacauga all my life. I have been with Allcomm for 20 years. I enjoy spending time with my family, especially on the lake, and shopping. As a service writer I am usually the voice you will hear when you call our shop. I schedule service calls and new installations for our technicians, order accessories, assist in equipping emergency vehicles with anything from radios to lighting systems and camera systems. While service is my primary responsibility, I am also very knowledgeable and directly involved with our sales department. I can assist with most aspects of your communications needs.
