## “Keeping GPS Simple”

### Why Track Your Fleet?

“You can’t manage what you don’t measure” Waste and inefficiencies come in many forms including:

- Excessive idle times • Poor driver routing
- Speeding and unsafe driving • Late starts/ long lunches
- False or exaggerated overtime timesheets

### How GPS Tracking Can Help Your Company

Use Digital GPS fleet tracking to see where your vehicles are every minute from your PC. Set up instant alerts on your email or phone. Vehiclepath is the most affordable Web-based solution available. They offer a full line of products from self contained battery powered devices to installed units capable of remote door unlocking, starter disable, and sensor events.

**Allcomm Wireless is now offering GPS by Vehiclepath and Airtime as low as \$23.95 a month!**

**Airtime rates are based on equipment type, refresh rates, and contract length. Monthly and Annual options are available along with asset tracking. Call today for a quote on a yearly contract for an even lower rate.**
